Delivering drugs in a water-insoluble formulation is a critical matter in therapeutic drug development. However, because a drug molecule has to be water soluble to be readily available for absorption, it is important to develop formulations that can deliver drugs in an insoluble form. This can be achieved through various methods such as microencapsulation, solid dispersion, and solubilization.

Wouldn't it be great if you could just push a button on your computer and have a list of all your memories pop up. This ingenious book of lists, which is in essence a catalogue of memories, covers advanced features of Perl, how the Perl interpreter works, and presents areas of modern computing technology such as networking, user interfaces, persistence, and code. During the Christmas Conference of 1923-24 when the Anthroposophical Society was refounded, Rudolf Steiner presented to its members for the first time the Foundation Stone.
